This study aims to investigate the influence of halal label, consumer perception, and sharia marketing on purchasing interest of Safi skincare products in Sekaran Village. This study uses a quantitative approach by distributing questionnaires to 68 respondents who are consumers of Safi skincare products in Sekaran Village. The collected data were analyzed using multiple regression methods to test the relationship between independent variables (halal label, consumer perception, and sharia marketing) and dependent variables (purchase interest) $Y = 11.896 + 0.163X_1 + 0.134X_2 + 0.121X_3$. The results showed that the variables halal label, consumer perception and sharia marketing have a significant positive influence on purchasing interest of Safi skincare products in Sekaran Village. In addition, from the f test, seen from the tabel results, the calculated F is 12.457 and the result of the F tabel = 5% is 0.05 is 2.74, which shows that the calculated F is $15.686 > F$ tabel 2.74, so there is a simultaneous influence between the variables Halal Label (X_1), Consumer Perception (X_2), and Sharia Marketing (X_3) on the Interest in Buying Safi Skincare in Sekaran Village.
