This research is motivated by the many cases of bullying that often occur in society, especially in the world of education, especially in Islamic boarding school environments. There are cases of bullying in the Islamic boarding school environment due to many factors, one of which is seniority carried out by old students towards new students.

This research aims to find out: 1. Analyze bullying behavior at the Raudlatul Muttaqin Islamic boarding school, 2. Analyze prevention strategies in dealing with bullying behavior at the Raudlatul Muttaqin Islamic boarding school. This research is qualitative research with a centralized interview research type.

The results of this research are several bullying behaviors. Bullying behavior at the Raudlatul Muttaqin Talun Sidogembul Sukodadi Lamongan Islamic Boarding School occurs in unpleasant actions among students, such as insulting their physical appearance, destroying friends' things on purpose, defaming their good name, giving inappropriate nicknames. , laughing at friends when they come forward and isolating friends during group work. Preventing bullying starts from cultivating noble morals in students through classroom learning, socializing bullying prevention, and installing bullying prevention banners. Another prevention strategy is serious handling by the boarding school administrators when bullying occurs and also cooperation with the parents or guardians of the students to improve their character both at home and in the community.
