Writing skills learning in schools is still very low, it is known from the ineffectiveness of students and many students are less interested in short story writing activities. It is hoped that the application of the critical incident strategy in learning short story writing skills will make it easier and increase students' interest in writing short stories. Based on this background, the aim of this research is to describe planning, implementation and to determine student learning outcomes in applying the critical incident strategy (important experience) in learning short story writing skills for class XI students at SMK NU 1 Karanggeneng.

This type of research is descriptive qualitative which is used to describe the planning, implementation and learning outcomes of students in short story writing activities. The data sources in this research are primary data and secondary data. The data collection techniques used are interviews, observation, tests and documentation. The instruments in this research were interview sheets, teacher and student observation sheets and test sheets. Planning data analysis techniques by reducing data, implementation data by describing indicators with percentages, and learning outcomes data by calculating the average obtained by students.

Based on the results of the research, the following data was obtained. Planning for implementing the critical incident strategy in learning short story writing skills in terms of achieving the learning objectives that have been prepared in the teaching module, implementing the critical incident strategy in learning short story writing skills in terms of teacher activity with a percentage of 99.11% and student activity with a percentage amounting to 96.47% which was declared effective, student learning outcomes through the application of the critical incident strategy in learning short story writing skills were declared effective and complete with an average score of 82% in the good category. Based on the data that has been collected, it can be concluded that the application of the critical incident strategy (important experience) in learning short story writing skills was successful very well and effectively to be applied to learning short story writing skills.
