**Keyword:** *Comparative study, English, Javanese, Grammar.*

This study is an attempt to analyze the English and Javanese language which focuses on the compound phrases. The sources of the data are English and Javanese are of two kinds: (1) some data of English and Javanese are made by the researcher because the researcher understands both English and Javanese; (2) some data are obtained from English and Javanese written materials, which are found in books, newspaper, internets.

It is a library research, in which by using comparative analysis the data were analyzed. The type of research used is descriptive qualitative. This study prioritizes analysis to find out the construction of English and Javanese Phrase. In order to achieve the main purpose of comparative analysis, the similarities, and differences between English and Javanese grammar. In this study, there are classification of the data.

The findings consist of English phrases. The difference of English and Javanese phrases is on its structure. The English compound phrase does not like Javanese. In addition, Javanese phrase does not have construction like English. Both English and Javanese compound phrase made up with different meanings. Both of them have own construction.

The findings of this study can be used as the guidance for the teachers to decide proper techniques to teach construction phrase and give more knowledge.
