The objectives of this study is to describe how the implementation of using Fan-N-Pick technique to teach English subject and identify the improvement of an English achievement in speaking skill by applying Fan-N-Pick technique to Junior High School. This study is Classroom Action Research. The subject of this study is the third grade Class at MTs Putra Putri Simo. There are 36 students in the class. The research was done in two cycles and every cycle was finished by four steps: planning, action, observation, and reflection and used two instruments to find data those are observation checklist and test. Data collection answers the research problem. The results of the study showed that the application of the technique of Fan-N-Pick technique has been success, since success criteria is reached. The criterion is 75% of students achieve the target value of ≥ 75 were based KKM. The result of the study showed that mean score 76,44 and 77,77% or 28 students have achieve the target of the KKM. The result of test (test 1 and test 2) and observation checklist showed that by using fan-N-Pick technique become more active in the process teaching and learning. Based on the result of these studies, the researcher encourages the teacher to use Fan-N-Pick technique in teaching speaking so that the students are motivated and interested to learn.
